

MileMaster Hi-Temp Wheel Bearing Grease #2

DESCRIPTION:

MileMaster Hi-Temp Wheel Bearing Grease #2 is a Red Lithium Complex-based extreme pressure lubricating grease, which is NLGI certified for the protection of disc brake and other wheel bearings as well as heavy-duty chassis and demanding multi-purpose industrial applications.

QUALITIES:

MileMaster Hi-Temp Wheel Bearing Grease #2 is a premium, all-purpose grease, which is excellent in applications requiring an excellent performance over a wide range of temperatures and mild-to-severe conditions.

- High-temperature EP Lithium complex grease
- Premium rust and corrosion protection
- Certified for disc brake wheel bearings and heavy-duty chassis
- Red in color for ease of visibility

APPLICATIONS:

MileMaster Hi-Temp Wheel Bearing Grease #2 is recommended for the most demanding automotive, industrial and household applications.

TYPICAL PROPERTIES:

Material Code	661480008
NLGI Grade	2
Penetration Worked ASTM D217	280
Grease Type	Lithium Complex
Color	Red
Timken OK Load lb.	45
Dropping Point D 2265	500
Rust Prevention ASTM D 1743	Pass
Four-Ball Weld KgF	315
